FCMC will share info on their new virtual environment - INNOVATIONS SANDBOX! Innovation sandbox provides an opportunity to ask questions to FCMC experts, learn about the developments in the innovations field and the opportunities opened up by them in the financial sector in Latvia, clearly important practical FinTech related matters, as well as suggest new debate topics for our future dialogue.

Latvia's central bank – the Bank of Latvia – offers support to fintech sector, including the most modern interbank payment infrastructure in the euro area: wide range of market participants thus have a chance to work on developing state-of-the-art financial services to individual customers and enterprises. Find out more about the innovative instant payments infrastructure of the Bank of Latvia, which can be utilised also by the non-bank payment providers; about the possibilities offered by PSD2 – the revised EU payment services directive - to new payment services providers and business models; the use of blockchain technology; the involvement of the Latvian national central bank in the area of distributed ledger technology.

VAS “Latvijas Valsts radio un televīzijas centrs” is the only provider of eSignature in Latvia and provides for its customers three different types of electronic signatures. A secure electronic signature, or eSignature shall mean a personal individual signature in an electronic environment, which has the same effect as physical signature in the real environment. At Demo place you will be able to learn about all types of secure electronic signature as well as test document signing with eParaksts mobile.

You will have a chance to meet representatives from Nordigen to discuss how to use artificial intelligence to extract insights from customer transaction data to improve credit scoring decisions. Nordigen will showcase its categorization engine and solutions offered.

You will have a chance to meet representatives from SEB to discuss different topics related with open banking, Innovation culture and future Innovation strategy. You will also have a chance to try and give feedback for our new video meeting solution. We will cover not only customer experience for remote interaction but also digital signing possibilities. Come and find out!

The demo space will be dedicated to Swedbank’s Open Banking platform and fintech collaboration opportunities Swedbank offers in all its home markets. Visitors will have a chance to meet Swedbank Group specialists committed to Digital Innovation projects.

Toneboard (Techstars London '17) is a leader in audio analytics with a focus on financial services and security. Toneboard provides highly accurate and convenient remote voice authentication solutions for banks. Toneboard also helps leading financial institutions unlock the power in their audio data with the help of predictive analytics, user profile building and other tools. During the event you will have a chance to learn more about Toneboard audio analytics solutions and how they can help you achieve your business objectives.
